# Like a Formula Racer

# Seamless Integrator of Ubiquitous Technology

Like the most competitive racing teams, we tune-up systems to an optimal level, and elaborate products that yield the best performance.

A formula racing car cannot achieve top-speed performance on the sole power of its engine. The fastest racer would need to have its engine, chassis, tires, and all its other components optimally tuned up to bring out top performance. In order for its customers' products to give their best performance in functionality, efficiency, and quality, eflow is offering not only products, but also a complete range of professional services, from product porting, customization, and tuning, to specific software developments, to offer a **One-Stop Solution** to its customers.

## Product Lineup

Full Browser, BML Browser (1seg, FullSeg), compact Browser  
High customizability via source code licensing\*

\* conditions apply

Accelerated Java VM thanks to proprietary compiler technology  
Java™ CLDC for mobile devices or Java CDC for stationary devices

Rich media player (movies, magazines, newspapers, etc.)  
Highly versatile content distribution framework with high picture quality
